Languages: English, Russian

Summary

iOS Developer with 8 years of experience building large-scale consumer apps, fintech solutions, and high-performance audio/streaming applications. Strong expertise in Swift, CI/CD, and modular architectures. Proven record of scaling teams, improving app stability, and driving measurable business outcomes.

Experience

Lenta Online – Senior iOS Engineer (Apr 2021 – Feb 2025)

- Reduced CI build time by 7x, improved pipeline stability, reworked app signing & distribution.
- Designed and launched A/B testing management system; enabled experiment workflows.
- Integrated multi-provider analytics; built technical & business metrics dashboards.
- Developed a unified codebase for 4 brands, improving maintainability.
- Boosted stability: crash-free rate grew from 94% → 99.9%.
- Initiated & led modularization process.
- Scaled team 4 → 12 developers and designed interview process.

Ayta AI – iOS Engineer (2024 – 2025)

- Optimized real-time speech converter for stutter support.
- Reduced audio pipeline latency 1.3s → 0.9s (multithreading, audio capture).

Vivid Money – iOS Engineer (Sep 2020 – Mar 2021)

- Increased onboarding conversion via A/B testing.

Linguix – iOS Engineer (2020 – 2021)

- Built companion app for grammar-checking keyboard.

LitRes – iOS Engineer (Sep 2019 – Sep 2020)

- Developed streaming audio player with CarPlay & advanced caching.

Binet – iOS Engineer (Feb 2019 – Sep 2019)

- Delivered and supported 10+ client apps.

SKIFAPP – iOS Engineer (Oct 2018 – Feb 2019)

- Supported core vehicle-tracking app; built child-tracking app from scratch.

Skills

Languages: Swift, Objective-C, Ruby, Python, Bash

Frameworks: RxSwift, Combine

Practices: Modularization, CI/CD, A/B Testing, Analytics Integration

Tools: Git, Fastlane, S3, CarPlay
